

ABM Musa

(312) 479-6693

amusa2@uic.edu

www.cs.uic.edu/~amusa

RESEARCH INTERESTS

Networked systems, mobile systems, mobile sensing, localization, tracking, video analytics.

EDUCATION

PhD in Computer Science

2009 – Jun 2017 (expected)

University of Illinois at Chicago (UIC)

Dissertation: Advanced Techniques for Mobile Localization and Tracking Advisor: Jakob Eriksson

BS in Computer Science and Engineering

2008

Bangladesh University of Engineering and Technology (BUET)

RESEARCH EXPERIENCE

Research Assistant

2010 – Present

BITS Networked Systems Laboratory (<http://cs.uic.edu/Bits>)

Developing a video-based real-time localization system with sub-meter accuracy for smartphones using the reconstructed 3D model of the environment and combination of efficient feature matching and tracking. Developed an online GPS tracking system [1, 2] that provides a unified relation between tracking error, uplink data usage, and timeliness of location reporting. Developed a system [3, 4] to track unmodified smartphones using Wi-Fi monitors, which can enable applications such as monitoring street traffic flow and crowd flow in public areas. Developed a mobile system [5] consisting of multiple Wi-Fi monitors, a GPS receiver, and a spectrum analyzer that can be used to analyze city-wide Wi-Fi characteristics, which was used to analyze the Wi-Fi characteristics in downtown Chicago.

Research Consultant

2014

ReadMe Systems, Milpitas, CA

Worked on the design and implementation of crowd monitoring in stores and shopping malls using Wi-Fi tracking based on our previous work [3,4] for this early-stage start-up.

Research Intern

May 2013 – Aug 2013

Wireless and IT Convergence Group

IBM TJ Watson Research Center, Yorktown Heights, NY

Mentor: Theodoros Salonidis

Designed and implemented a framework [6] for IBM InfoSphere Streams to distribute the data and computation of mobile applications in a hierarchical network (mobile-edge-cloud) to achieve improved application performance and optimal system resource utilization.

Research Intern

Jun 2012 – Sep 2012

Mobility and Networking Research Group

Microsoft Research, Redmond, WA

Mentor: David Chu

Designed and implemented an app-centric and context-based mobile socialization platform [7], including a developer API and efficient cloud-based data processing.

TEACHING EXPERIENCE

Teaching Assistant

2009 – 2012

UIC Department of Computer Science

Assisted in teaching Computer Networks (Fall '12, '11, '10), Computer Architecture I (Spring '10, Fall '09) and Introduction to Programming (Spring '10). Developed automated grading scripts for the assignments in the Computer Networks course to provide early feedback to students and accelerated grading.

WORK EXPERIENCE

System Integration Engineer

Jan 2008 – Aug 2009

Core Networks, Network Deployment and Integration

LM Ericsson Bangladesh Ltd.

Worked on MPBN (Mobile Packet Backbone Network) - IP backbone of Mobile Operators Worked on MPLS, MP-BGP, ISIS, OSPF, RSVP-TE, LDP, and VRRP protocols, L2 and L3 VLAN, policy-based routing, QoS using Diffserv and ACL for MPBN

AWARDS

Third place in UIC research forum competition among Engineering and Physical Science (2011)
Dean's List for excellent academic performance in BUET (2004 – 2007)
University Merit Scholarship at BUET (2003)

SERVICE

Reviewer for IEEE Transactions on Intelligent Transportation Systems (2016 – 2017)
Reviewer for International Journal for Geographical Information Science (2017)
Treasurer at UIC Computer Science Graduate Student Association (2012 – 2013)
